## Experience

### Junior System Analyst

Group Medical Services

01/2021 - Present

- Automate the process of validating and importing customer data from external server to internal systems.
- Provide support, maintaining and troubleshooting on the company's applications to ensure day-to-day business runs smoothly.
- Work on multiple projects with different priorities changing everyday (requests from other departments, fix bugs and develop features for company's internal application, improve business process, and work on business projects).

### Teaching Assistant

University of Regina

01/2020 - 12/2020

01/2018 - 04/2018

- Created code samples, provided lectures and answered students' questions on Computer Science laboratory sessions.
- Guided students through CS labs' exercises, marked and provided feedback on their assignments.

### Junior Developer

University of Regina Students' Union

11/2019 - 12/2020

- Developed locker registration system from which students can verify their status, check and select available lockers from an interactive map, then pay for it in a single flow.
- Developed an online store (Woo Commerce) for the organization's merchandise with custom code to calculate and display final price (all included) so that students pay exactly what they see.
- Developed utilities for the organization internal application such as password generator (conform to security requirements) and signature generator (so that all employees have the same format).

### Coop IT Software Developer

EVRAZ North America

01/2019 - 08/2019

05/2018 - 08/2018

- Designed and implemented workflows to help speeding up business processes from other departments.
- Transferred data of 8000 employees including sensitive information from external sources to the organization's systems
- Implemented Google Search bar on the company main website.

### TWEP Hardware Technician

CFS Saskatchewan

05/2017 - 08/2017

- Refurbished PCs and laptops.
- Categorized and inventoried shipments from organizations and individuals.

---
